Changing the Default Course Entry Point

By default, courses that are created in Blackboard Learn will enter their course via the default Course Homepage. Instructors can customize and change this entry point.

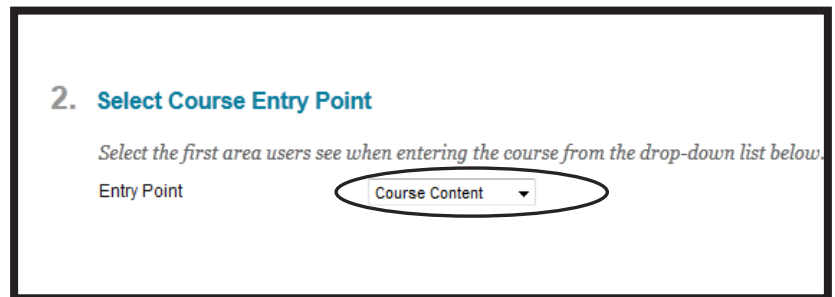

1. To change the default entry page, go to the **Control Panel** located on the left hand side of the page.

Under **Customization**, select **Teaching Style**.

2. Under the Teaching Style menu, scroll to the second listed item, **Select Course Entry Point**.

3. **Select** the area that you wish for users to first see when entering the course page from the **drop-down list** of options.

4. Click **Submit**.
5. Log out of myCourses and log back in to view the new course entry point.
